

The proceedings of the 21<sup>st</sup> International Liquid Crystal Conference will be published in the journal *Molecular Crystals and Liquid Crystals* with Guest Editors Noel Clark, David Walba, Joseph MacLennan, and Matthew Glaser, of the University of Colorado.

**Article Submission** Manuscripts should be printed on one side of 8.5 x 11 inch or A4 paper, in 11pt type or larger and double-spaced throughout, including the references section. Three copies of the manuscript should be submitted at the conference (or by mail by July 31 at the latest). **Manuscripts will be reviewed using paper copies only. Electronic files will be required only after the paper has been reviewed and accepted for publication.** Authors should also supply a shortened version of the title suitable for the running head, not exceeding 50 character spaces. Each article should be summarized in an abstract of not more than 100 words. Avoid abbreviations, diagrams, and references to the main text in the abstract. Articles must also have three to six keywords. Authors should include telephone and fax numbers, as well as e-mail addresses, on the cover page of the manuscript.

Each manuscript must be accompanied by a statement that it has not been published elsewhere and that it has not been submitted simultaneously for publication elsewhere. Authors are responsible for obtaining permission to reproduce copyrighted material from other sources and are required to sign an agreement for the transfer of copyright to the publisher. All accepted manuscripts, artwork, and photographs become the property of the publisher. Manuscripts will not be processed without a completed and signed Copyright Transfer form.

If appropriate, a fully completed CIF (Crystallographic Information File) should be deposited with the Cambridge Crystallographic Data Centre (send files as attachments to [deposit@ccdc.cam.ac.uk](mailto:deposit@ccdc.cam.ac.uk)) and the returned deposition number quoted in the experimental section of the manuscript.

**Electronic Files** Once your paper has been reviewed and accepted, the Guest Editors will request an electronic version of the final manuscript. **Files should then be sent to the Guest Editors on CD (see mailing address below).** Taylor & Francis prefers that you use Microsoft Word or WordPerfect in a PC format, but will accept any standard word processing software output. Please save all text in one unified file including: the title page, abstract, all sections of the body of the paper, and references, followed by the tables and figure captions. Figures should be in separate files.

**Illustrations** Illustrations (line drawings, halftones, photos, photomicrographs, etc.) should be submitted as clean originals or digital files. Digital files are recommended for highest quality reproduction and should follow these guidelines:

- 300 dpi or higher
- sized to fit on journal page
- EPS, TIFF, or PSD format only
- submitted as separate files, not embedded in text files

Color illustrations will be considered for publication; however, the publisher has the right to publish illustrations in black and white if color is deemed unnecessary and reserves the right to refuse publication of any artwork deemed unacceptable.

**Tables and Figures** Tables and figures should not be embedded in the text, but should be included as separate sheets and files. A short descriptive title should appear above each table with a clear legend and any footnotes suitably identified below. All units must be included. Figures should be completely labeled, taking into account necessary size reduction. Captions should be printed double-spaced, starting on a new page at the end of the document. All original figures

should be clearly marked in pencil on the reverse side with the figure number, first author's name, and top edge indicated.

**References** References are indicated in the text by consecutive superior arabic numbers enclosed in brackets. For example, the first reference would be [1], the following reference [2], and so on. The full list should appear at the end of the paper in numerical order. The references should be complete in all details, excluding article titles in journals. Authors' initials should precede their names; journal title abbreviations should conform to the style of the American Physical Society. Examples for referencing, respectively, a journal article, a book, and a chapter in a book follow:

[1] A. B. Mann, R. C. Cammarata, and M. A. Nastasi, *J. Mater. Res.* **14**, 2195 (1999).

[2] H. Buchner, *et al. Hydrogen and other alternative fuels for air and ground transportation*. Wiley: Chichester, UK (1995).

[3] T. Jeffrey, *et al. Pulsed Laser Deposition of Thin Films*. D. B. Chrisey, G. K. Hubler (Eds.), Chapter 6, p. 186, Wiley-InterScience: New York (1996).

**Offprints/Reprints** Each corresponding author will receive a PDF file of the article via email (a CD-ROM containing the PDF file may be sent in certain instances). The PDF file may be circulated up to 50 times either in print or electronic form. Reprints of individual articles may be ordered at the time authors review their proofs. A discount is available to authors who order before print publication. Further information can be obtained from the publisher's web page at <http://www.taylorandfrancis.com>.

**Submission Deadline** Authors are urged to submit their manuscripts at the beginning of the conference in Keystone: timely submission will enable rapid, on-site peer review during the meeting. The submissions desk will be staffed on Sunday afternoon and during the morning coffee break each day from Monday to Wednesday only. The manuscript must be accompanied by a **Transmittal Form** and a signed **Copyright Transfer Form**, both of which can be downloaded from <http://www.ilcc2006.com/downloads.htm>. The **Instructions for Authors** (this document) may also be downloaded from the conference website.

*The author instructions posted on the Taylor & Francis website do not apply to ILCC2006.*

Post-conference submissions will be accepted only until July 31, 2006. These manuscripts may be mailed to:

ILCC Proceedings  
Liquid Crystal Materials Research Center  
Physics Department, 390 UCB  
University of Colorado  
2000 Colorado Avenue  
Boulder, CO 80309-0390  
USA

Manuscript revisions and final electronic files on CD should be sent to the same address.

## AIMS AND SCOPE

Primarily fundamental in tenor, *Molecular Crystals and Liquid Crystals* publishes original research papers of both an experimental and theoretical nature in three areas of specialization: molecular crystals (spectroscopy, energy, and charge transfer, solid state reactions, photo and radiation effects); low-dimensional solids (structure, electronic, magnetic, and optical properties, transport mechanisms); and liquid crystals (electro- and magneto-optical phenomena, thermodynamics, phase transitions, structure, NMR and orientation controlled spectroscopy). In all three areas, experimental manuscripts describing both preparation and properties will be considered.
